

CAREER PATHWAY FORTUNE TELLER

How to play:

- 1 Choose one of the 4 options - then spell out that word, opening and closing the fortune teller on each letter.
- 2 Pick a number from the 4 shown - open and close the fortune teller that many times.
- 3 Pick a number from the 4 shown - lift that flap to see what pathway question the fortune teller has for you.

How to make the pathway fortune teller:

- 1 Carefully cut out along all the solid grey lines.
- 2 Fold in half along the red line shown in pic on the right, ensuring the print is on the inside. Open up and fold in half again along the other red line (pic A).
- 3 Turn fortune teller over so you can see the blank side. Now fold all the corners backwards along where the red line shows in pic B.
- 4 Flip the whole thing over to look like pic C. Then fold all these corners backwards again to look like pic C2.
- 5 Fold in half so the numbers are on the inside, then open up and fold in half the other direction. Now push your thumbs and forefingers into the 4 pockets under the 4 coloured corners pic D - You can now open and close the fortune teller and begin to play.
